

## Page 1: Introduction

This is a sample paragraph with some text that should break across lines. The word hy-phenation is intentional and should appear at a line-break for testing purposes.

### Bullet Points:

- Simple to use
- Lightweight
- Highly customizable
- Cross-platform support

### Numbered List:

1. Install the library
2. Import the class
3. Create an instance
4. Call the desired methods

**This is bold red text.**

*This is italic green text.*

## Page 2: Features Overview

This is a sample paragraph with some text that should break across lines. The word hy-phenation is intentional and should appear at a line-break for testing purposes.

### Bullet Points:

- Simple to use
- Lightweight
- Highly customizable
- Cross-platform support

### Numbered List:

1. Install the library
2. Import the class
3. Create an instance
